Male Cone

### Catalogue Key

Indicates Height

Indicates Diameter

Indicates Leaf Size

Indicates Region

Indicates Best Suited Climate

Trunks to 1 metre tall

35 cm

1.75 - 2 metres long - dark green to blue-green

Endemic to western Usambara Mountains in north-eastern Tanzania, close to the border with Kenya

Tropical to subtropical regions. Plants can be grown in full sun but best appearance is obtained with some protection

### Benefits of Using Cycads in Landscaping

- Drought hardy
- Water Wise
- Attention grabbing
- Architecturally striking plants
- Predictable growth dimensions
- Will happily grow in shade, part shade and full sun situations
- Require very little maintenance
- Insect resistant

**Plants need protection from frosts**

**Cycads are Unique – they give an exclusive, unique, prehistoric and upmarket touch to your landscape. They are elegant and compliment many other types of plants.**
